

DS/15/S

Product code: DS/15/S

Manufacturer: Solartron

The DS / 15 / S is an LVDT guided with spring characterized by internal electronics.

The S series of displacement Transducers is the culmination of many years' experience gained from Solartron metrology's highly successful mach One range plus careful note of market feedback. The result is a totally new range of transducers that is better able to satisfy today's demanding manufacturing and research applications.

It has a stroke (mm) of 15.

Optimal in the areas of transport, energy, hydraulics and oleodynamics and in various industrial applications in the field of automation.
