

EM5342

Product code: EM5342

Manufacturer: Figaro Engineering Inc.

The new module EM5342 is designed to test and evaluate the electrochemical carbon monoxide sensor TGS5342, allowing the evaluation of the basic performance of the sensor and for understanding its application circuit.

Features:

- Converts sensor output current to voltage output
- Module designed with electrical noise reduction for stable operation
- Wide supply voltage range
- Anti-polarization circuit during power OFF period

Measurement range	0-10.000 ppm
Compatible sensors	TGS5342
Target Gas	Carbon Monoxide
