

Oktilab

Product code: Oktilab

Manufacturer: Tecnosens SpA

Oktilab is a multi-station system for the quality control of glass containers. The platform is modular and allows dynamic addition of the required inspection stations. The use of a collaborative robot eliminates all repetitive operator tasks. The system recognizes the recipe and enables sample traceability, while also allowing autonomous programming of new models. It can be used both in laboratories and production lines.

Features

Thickness measurement and inspection

Dimensional inspection

Stress measurement and inspection

Weight measurement and inspection

7-segment cavity inspection

Dotcode cavity inspection

Feeding types

Conveyor belt pick-up

Tray pick-up

Self-centering pick-up

Key strengths:

- Multi-measurement solutions
- Compact design
- Customized for customer needs

-
- Modular and scalable
 - Intuitive guided programming
 - Process statistics reports
