

AS-DT1

Product code: AS-DT1

Manufacturer: Sony

The AS-DT1, is the world's smallest and lightest LiDAR Depth Sensor structure measuring just 29mm x 29mm x 31mm (approximately 1.14 inch width x 1.14 inch height x 1.22 inch depth), excluding protrusions, and weighing only 44 g (approximately 1.76 ounces).

The AS-DT1 leverages miniaturization and optical lens technologies from Sony's machine vision industrial cameras making it ideal for applications where space, and weight constraints are paramount including, drones, robotics, and more

Frame rate	30 fps
Digital interface	USB-C
