

Laser Pointer

Codice prodotto: SI-
LP-800/2500-635-30

Produttore: Tecnosens SpA

The Tecnosens SI-LP laser pointer provides a precise visual reference to help forklift operators align loads accurately and efficiently in industrial warehouses. Designed for high-lift operations, it ensures correct positioning of goods even at heights up to 15-20 meters.

The device mounts directly onto the forklift forks, projecting a horizontal laser line along the racks. This clear reference reduces errors, minimizes product damage, and streamlines workflow. Its robust construction—including anodized aluminum housing and IP67-rated protection—guarantees reliable operation in harsh industrial environments, from -30°C to $+50^{\circ}\text{C}$.

Ideal for vertical warehouses and high-precision material handling, the SI-LP combines safety, efficiency, and durability, allowing operators to work faster and with greater confidence.
